NFB™ 4.2 DUAL CABLE SYSTEM
(Steering Wheel not included.)

NFB™ 4.2 MECHANICAL ROTARY STEERING (DUAL) SYSTEM

Patented No FeedBack Steering Control for about the cost of an old-fashioned steering replacement. With the advantage of 4.2 turns lock-to-lock and our patented No FeedBack steering to lock out steering loads, Teleflex's 4.2 Rotary NFB Steering is the ideal system for most non-power-steered boats. This rugged dual cable system is made for applications with engine flutter or steering instability. The helm is a drop-in replacement for current generation Safe-T with no dash modifications required.

APPLICATIONS

NFB 4.2 dual-cable systems are suitable for most single-station boats with a single non-power-assisted outboard or stern drive engines up to V-6 in which engine flutter or steering instability is present. 4.2 accepts wheels up to 16" diameter. Replaces nearly all Teleflex Safe-T® steering systems without dash modification. Replaces nearly all Teleflex Safe-T® steering systems (including twin cable) without dash modification.
